Super Prism ART PROJECTOR

**The 2-lens
choice for the
professional with
an eye for detail.**

The Super Prism features two lenses: a 3-element, color corrected lens for extra sharp images with increased brightness and the standard Prism lens for extra projection range to 80% reduction. The Super Prism is ideal for working from a variety of challenging materials like photographs, halftones, and highly detailed designs.

Great for: fine art, illustrations, murals, airbrushing, craft projects, banners and more!

Image shown is enhanced for demonstration. Projector must be used in a darkened room.
