

# PANTONE®

## The Pantone Tints and Tones Collection PTTC100

### Overview

Looking for the best neutrals in plastics? This set includes 100 of the best-selling whites, grays, and blacks, selected from both the Pantone Graphic (PMS) and Fashion, Home, and Interiors (FHI) color libraries. This carefully curated range of cool and warm shades affords the ability to cross match plastic designs with textile products, graphics, and packaging. Each chip includes pigment formulations to ensure color control across multiple materials.

### Format

- Single carousel with a rotating base for easy color selection and chip replacement
- Made of Polypropylene, the most referenced plastic material
- Each Chip is 3" x 1.9", large enough to be measured by a spectrophotometer
- Two tiers of thickness, 1mm and 2mm, allows for accurate color visualization
- Double sided with gloss and matte finishes for accurate color visualization
- Key ring hole in top right corner to allow chips to be organized into palettes

### Color

- Collection features 100 of our most sought-after neutral shades
- Includes 46 FHI and 54 PMS colors in black, white, grey, and taupe
- Each Pantone Chip referenced by Pantone Color Number and/or Name
- Each chip includes corresponding pigment formulations for manufacturing accuracy
- CD included with numeric and chromatic color index

### Application

*Industry: use for any product made of colored plastic, including beauty, food & beverage, consumer electronics, fashion accessories, hard home, toys, medical devices, and more*  
*Use Case: palette development, color communication, and production of plastic products in neutral shades*
