		FOURTRAX 90	LEM CAYMEN		YAMAHA RAPTOR 250	

The MX and ATV templates come in both .eps and .plt formats, so it will work with all graphic design programs! The MX template disk contains only "true" MX bikes, there are some templates of "off road" bikes such as: DRZ and TTR. Templates go back to early to mid 1990's through 2011, and some of the major bikes, such as the 125, 250, etc. can go back to 1988. Each bike has two templates: kit and backgrounds. The kit includes, shrouds and/or tank pieces (when called for), rear fender, front tip and swing arms. As it wasn't until the last year or two where the fork guards and air box covers were wanted, the older templates don't include these all the time.

Effective 11/18/2011. Prices subject to change without notice.
